Press Release

InControl Technology announces a Global IoT Technology Asset Catalog and Registry

The industry's 1st registry enables vendors to place their IoT devices, configuration items and associated protocol information

San Diego, Monday, March 6, 2017: InControl Technology, Inc., a leading supplier of 100% Web-based IT Asset Management solutions, today announced the introduction of the IoT Technology Asset Catalog and Registry available to the market.

The IoT Technology Asset Catalog and Registry provides a portal that all manufacturers or vendors can catalog and define all IoT assets by configuration. "We recognize the future wave of exciting technology assets that IoT brings with the need to be able to access, categorize and store all items. From sensors, control modules, robotics and micro-computers it ensures that it is a manageable asset or a known-device within the corporate infrastructure." said Ben J. McCullom, Executive VP at InControl Technology. "We are now entering the era of IoT and the Cloud, the new IoT Technology Asset Registry Catalog fits perfectly with technology now manifesting itself in everyday corporate and i personal lives" he added.

With the IoT Technology Asset Registry Catalog in place, all technology users, ownership and manageability can be shared with all solutions in the world to help corporations control risk, security and manage costs.

The IoT Technology Asset Catalog Registry portal will be available soon!
